About Me

Frontend-focused Full-Stack Developer with 5 years of experience building responsive, accessible, and performant web applications with React and TypeScript. Comfortable across the full stack — from REST API design (Node.js / FastAPI) to UI component systems and CI/CD pipelines.

Skills

- Frontend: React.js, TypeScript, Next.js, Vue.js 3, HTML5, CSS3, Tailwind CSS, Storybook
 - State Management: Redux Toolkit, Zustand, React Query (TanStack Query), Context API
 - Testing: Jest, React Testing Library, Cypress (E2E), Playwright
 - Backend: Node.js, Express.js, FastAPI (Python), REST, GraphQL
 - Databases: PostgreSQL, MongoDB, Firebase Realtime DB
 - DevOps / Tools: Docker, GitHub Actions, Vercel, Netlify, Webpack, Vite
 - Design: Figma, Adobe XD — comfortable working directly from design files
-

Work Experience

Senior Frontend Developer — DigitalProduct Studio, Madrid (Apr 2022 – Present)

- Led frontend architecture for SaaS project management platform (50k+ users) with React 18 + TypeScript + Next.js.
- Built internal component library (60+ components) with Storybook, adopted across 5 product squads.
- Improved Lighthouse performance score from 61 to 94 via code splitting, lazy loading, WebP/AVIF.
- Introduced Cypress E2E suite covering 80% of critical flows; reduced regression reports by 45%.
- Mentored 2 junior developers through pair programming and weekly 1:1 sessions.

Full-Stack Developer — EdTech Startup, Remote (Jan 2019 – Mar 2022)

- Built interactive online learning platform (React + FastAPI) for 10,000 students across 3 countries.
 - Developed real-time collaborative whiteboard using WebSockets (Socket.io) and Canvas API.
 - Designed GraphQL API replacing legacy REST; reduced client-side data over-fetching by 55%.
 - Integrated Stripe subscriptions and PayPal with SCA compliance for EU users.
-

Education

B.Sc. Computer Science — Universidad Politécnica de Madrid (2018) | GPA: 9.1/10
